

Voltage Multipliers, Inc.

www.voltagemultipliers.com

Voltage Multipliers, Inc. began operations in November of 1980. Initially designing and producing voltage multipliers, our product line has expanded to include diodes, high voltage power supplies and rectifier assemblies.

VMI is dedicated to quality. Statistical methods are utilized for product design, verification and production.

VMI is run on the principle that quality is cost effective and essential. Our quality system is certified to ISO 9001 and meets or exceeds MIL-I-45208 standards.

All operations are located in Visalia, California. Our facilities have grown to 34,000 sq. ft. of manufacturing area with 10,000 sq. ft. of office area.

VMI's sales organization includes world-wide representation as well as direct factory support. Sales information and product inquiries may be directed through your local sales representative or directly to our facility.

- *Hermetically Sealed Chips*
- *Low Voltage Rectifiers*
- *High Voltage Rectifiers*
- *Low Voltage Assemblies*
- *High Voltage Assemblies*
- *Multipliers/Hybrids*
- *H.V. Power Supplies*
- *H.V. Opto-Couplers*

**ISO 9001
REGISTERED**
